DIY KIT & INSTALLATIONS

MINIMIZE THE EXPOSURE

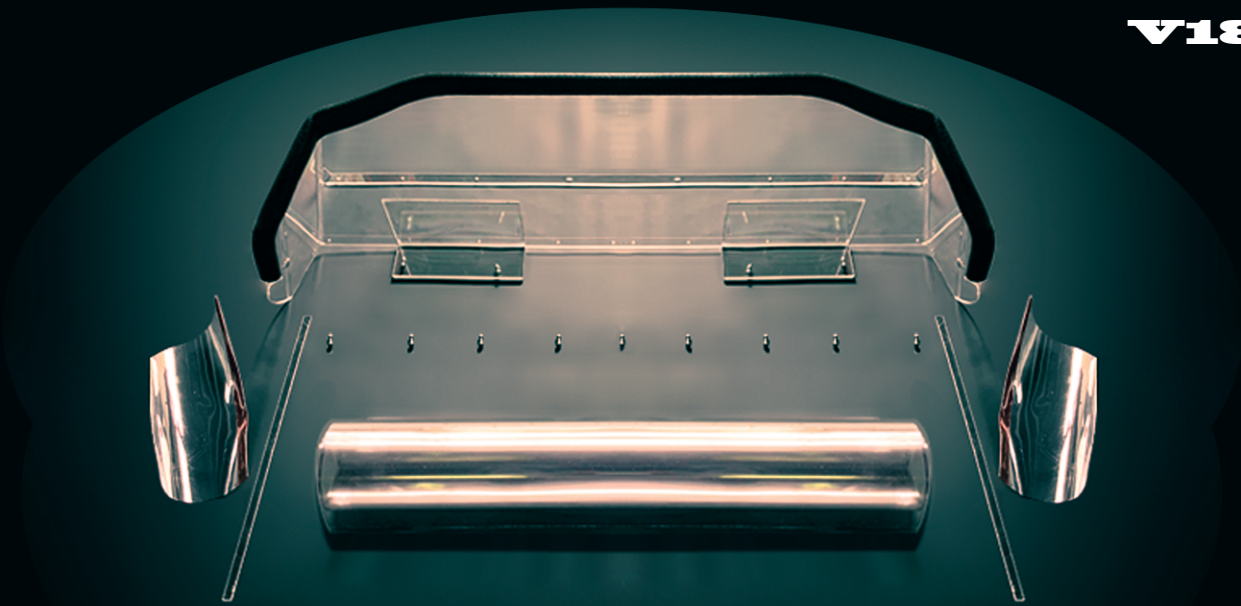

Taxidepot

24-50 47TH ST, ASTORIA, NY 11103 / TEL: 718.784.4737

This shield is intended to minimize physical contact between driver and riders and to prevent dust and droplets from freely circulating within the vehicle. It is not intended to fully protect riders or drivers against any specific viruses or other infectious agents.

* Note: Before you place an order for this unit, please ensure your local city and state laws permit this unit installation.

** Refund Policy: All sales are final. Taxidepot, Inc. does not offer exchanges, returns or refunds on the partition guard offered for sale in our store.

Parts Included

1 Top glass, 1 Marine-Grade flexible vinyl barrier, 2 Metal Ceiling brackets, 2 Headrest brackets,
2 Lateral Brackets, 1 Horizontal Holder bar, 2 Flexible wings, 2 Lateral Tensors. All hardware included.

*** Please note: Lateral Brackets and Lateral Tensors are NOT provided when ordering the headrest mount option.

Headrest Mount

This option does not require drilling into the vehicle, but since the partition is held by 2 headrest brackets, it requires you to set and lock the front seats in one position only.

Front seats should not be adjusted, otherwise, the partition will lose tightness.

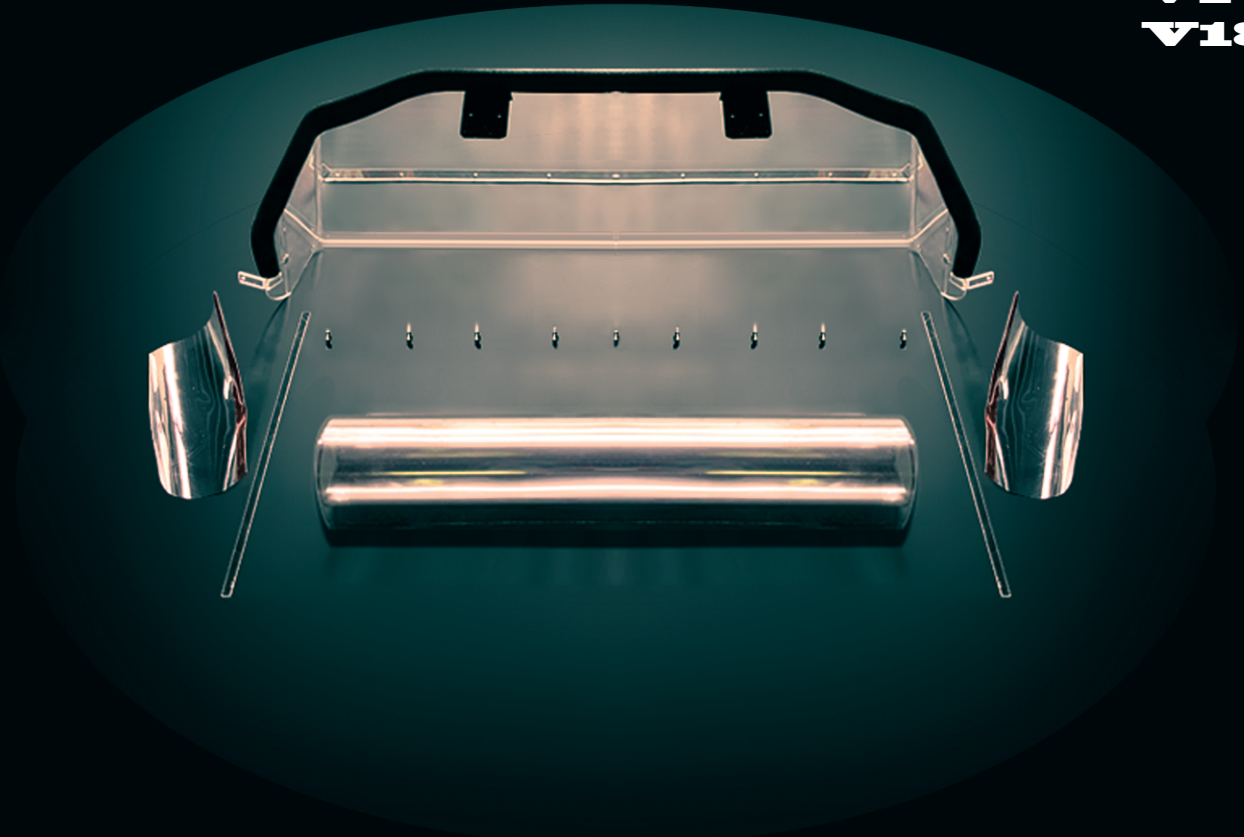

Lateral Post Mount

This option requires drilling into the ceiling and at each of the lateral posts. Front seats are able to move back and forth from the partition limit to the front.

This shield is intended to minimize physical contact between driver and riders and to prevent dust and droplets from freely circulating within the vehicle. It is not intended to fully protect riders or drivers against any specific viruses or other infectious agents.
